

Administering Medical Marijuana to Students

The following procedure must be followed for the administration of medical marijuana to students at school. In accordance with the applicable law, this section only applies to students under the age of 18. Students 18 years of age and older may not use medical marijuana at school.

- A.** The student's designated primary caregiver (who must be a parent, guardian or legal custodian) shall obtain a copy of the RSU 40/MSAD 40 Parent/Provider Request to Administer Medical Marijuana at School form from the school nurse or school office.
- B.** The primary caregiver and the student's authorized medical provider (physician or certified nurse practitioner) shall complete and sign the Parent/Provider Request to Administer Medical Marijuana at School form and attach a copy of the current written certification for the use of medical marijuana.
- C.** Arrangements will be made between the school administration and the primary caregiver to schedule the administration of medical marijuana in a manner that will minimize disruption to school operations and the student's educational program.
- D.** Medical marijuana must be brought to school by the primary caregiver, and may not be held, possessed or administered by anyone other than the primary caregiver. The student may only possess the medical marijuana during the actual administration process. Medical marijuana administered in school must be in non-smokeable form.
- E.** If the administering of medical marijuana is to be done in a school building, the administering primary caregiver must check-in at the school office upon arrival and check-out at the office following the administration of medical marijuana. Upon checking-out the caregiver shall transport any remaining medical marijuana off school premises.
- F.** Medical marijuana may only be administered in locations approved by the Superintendent.
